

Quantitative test strips

QUANTOFIX® semi-quantitative tests strips

QUANTOFIX® test strips are semi-quantitative in nature. They meet all requirements for a modern rapid test.

Benefits:

Rapid

Most of the QUANTOFIX® test strips can be carried out in 10-120 seconds. That makes the application very **quick** for the end user.

Convenient

All QUANTOFIX® tests are ready to use kits. They are precalibrated and contain all necessary equipment and reagents. As "labs in a pocket" they are very **handy** for the end user.

Precise

The color charts are adjusted and checked using certified standard solutions that are directly traceable to primary NIST standards. The user can be sure to receive **accurate** readings whenever he tests.

How to use QUANTOFIX® test strips

Immerse all test fields completely.

Shake off excess liquid.

Compare the test field with the color scale.

Make sure to store the packs in a dry, cool place at 4–30 °C. Some tests are separately marked to require cool storage at 4–8 °C. To ensure the longevity of the test strips, please close the tube immediately after removing a strip. The desiccant in the stopper effectively protects the strips against moisture.

The strips can safely be used up to the date printed on the pack. The initial shelf life of the QUANTOFIX® products is 2.5 years after production.
